

**KS10** Motor skills wall

### Product info

Background lacquered birch plywood, thickness 18 mm. Plastic climbing holds. Climbing rope made of strong nylon. Climbing pole powder-coated metal. Wall mounting. Weight limit 60 kg.

Climbing holds of different colors are shaped in such a way that it is easy for the child to get a good grip with their hands and take support with their feet. Color of the climbing pole RAL 7042 grey. Optional KS12 anti-climbing plate. The climbing area must be designed so that the child cannot hurt him- or herself when he or she drops. It is recommended to equip the underside of the climbing area with padding mattresses.
